

NorthWoods Energy Audits Price & Services

(not new construction)

Wisconsin Home Energy Audit Includes:

- **Infrared camera testing** inside and outside the home. We appreciate full homeowner participation during the inside portion of this test to ensure maximum comprehension of what needs to be accomplished.
- **Carbon Monoxide testing.**
- **Blueprint analysis (if they are available).** Also a good time to show the auditor pictures of any hidden of the home (i.e. inside walls, framing, or new additions to the home. We are very detailed oriented which we feel is necessary for complete understanding of your home.
- **Blower door test** with leak detection. This test is used to test for air leaks in the home.
 - Includes an assessment on the total size of all your homes leaks.
 - Building codes regulate how many ACH (Air Changes per Hour) a building should have. A Wisconsin Energy Audit will let home owners know exactly how many ACH their home has and if the home owner and occupants are at a health risk.
- **Insulation inspection.**
- **Exhaust fan testing** (ex. bathroom fans).
- **Moisture concerns:** Identify areas of moisture concern and figure out ways to correct humidity issues.
- **Focus on Energy rebates,** discussion and verification. Make sure you keep all receipts and hi-lite the items used if more than 1 item is on the receipt. Wisconsin Energy Audits fills out the necessary forms and will submit all information needed to qualify your rebates; this saves the customer the hassle of filing for rebates.
- **Computer Simulation** (finished after site visit). Reports are generated and distributed to the client within 14days. Example of possible reports are as follows:
 - **Detailed Reports given to client: ROI (Return On Investment) report.** This report lets homeowners know how much money and energy they will save by performing the energy improvements.
 - **Mechanical equipment sizing report:** This report lets homeowners know the exact size of furnace/AC needed in order to avoid overpaying on energy bills or for the furnace itself.
 - **Improvement report:** Pictures of home details, with information on how to improve these areas, based on what the homeowner is trying to achieve.
- **Free 2nd site visit!** Wisconsin Energy Audits is committed to making sure that recommendations are followed through correctly with contractors. We will return to the home a second time to verify improvements for cash back rewards if applicable. This 2nd site visit is FREE if it is used to qualify rewards with Focus on Energy!
- **Absolutely no sales.** Wisconsin Energy Audits guarantees that our service is unbiased. We have no special interest in any company or service that would lead us to alter our recommendations or analysis of your new or existing home. If you have a window contractor come into your house then they will probably tell you that you need new windows to make your home more efficient. Wisconsin Energy Auditors are professionals in whole house energy consumption and we know how to identify what areas of your home makes the most sense to improve.

Price for this audit is only \$425! Jobs are billed after site visit, at the time of or after the reports are distributed to the client. Reports are typically sent within 14 days of the initial site visit. [Discover your savings while increasing your comfort and safety today!](#)
